

Low and Zero Carbon Framework Guide

A framework agreement providing a compliant and cost-effective procurement solution for social housing landlords to support their retrofit and decarbonisation plans.

The frameworks have been developed to support social landlords and other public sector bodies to help them deliver retrofitting and decarbonisation across the UK. The framework provides materials, consultancy and installers to retrofit the major technologies that landlords are using to reduce their carbon footprint using PAS 2035 methodologies. It's been designed to support both government-funded projects, like Warmer Homes, or self-funded investment programmes.

The framework is a one-stop procurement service that provides cost savings by using collaborative purchasing strategies, specialist local supply chains and prepared contract agreements. We actively support you using this framework and provide ongoing support throughout the term of the contract, including ongoing price management to ensure true long term best value is preserved beyond the initial contract award. Our dedicated social value teams work closely with our members, contractors, suppliers and employment groups to develop career opportunities and investment in local communities.

Framework Structure

Installation

- Multi-measure retrofit
- Air source heat pump
- Ground source heat pump
- Electrical heating
- Photovoltaic and battery systems

Materials

- Distribution of renewable technologies
- Air source heat pumps (domestic and commercial)
- Hot water cylinders
- Ground source heat pumps
- High heat retention storage heaters
- Infra-red technologies
- Smart controls
- Photovoltaic and battery systems

Consultancy

- Retrofit assessment, design and co-ordination services

Benefits

Specialist contractors and suppliers

Frameworks designed to attract accredited, experienced contractors for specialist works.

Choice of supply & fit combined or separately

Supply and fit combined or separate, offering flexibility, potential VAT savings and value.

Contractual Flexibility

A range of JCT or other standard maintenance and construction contracts available to suit project needs.

Regional lots to support SMEs

Regional and national lots available, with bidding limited to two regions to encourage SME participation.

Social Value

Training and employment opportunities linked to local communities, with framework surpluses reinvested in local jobs and community groups.
